

I support the comments submitted by the American Radio Relay League with regards to Docket 03-104. I believe that BPL will cause irreparable harm to services licensed to operate in the 2 to 80 MHz frequency range. I believe that there is no way to reduce the interference this would cause. Approval of ET 03-104 would violate the FCC rules on non-interference and would not be in the best interest of the public. Please see the test made by The American Radio Relay League.
